DISCUSSION & INSIGHT

- Basic Pharmacovigilance (PV) and PV Practices
- Applied PV, Risk Management Plan, PV Plan, and Causality Assessment
- Model-based Stability Testing
- Impurity Detection in Pharmaceutical Products

ABOUT THE PROGRAM :

This program will incorporate training modules, live lectures, and hands-on exercises designed to build expertise on PV practices, develop practical skills in applying model-based stability, and equip professionals with knowledge on impurities that could compromise drug integrity and patient safety. The main focus will be on the impurities and stability of anti-retroviral and anti-tuberculosis (TB) drugs.
